OBJECTIVE

Passionate software developer eager to find an opportunity where I can contribute my skills and enhance them. Completed multiple projects within deadlines, delivered clean and functional products. Constantly learning and practicing software developer skills.

EDUCATION

Full Stack Immersive Developer | Jan 2020 - Present

DIGITALCRAFTS

- 16 Week intensive accelerated learning program.
- Covered full-stack development, testing skills by building projects.

SOFTWARE DEVELOPMENT PROFOLIO

Meet Me Halfway | <https://github.com/JohnKearney2020/API-Project>

Used google maps and Zomato API, that worked together to build an application. Taking two addresses and finding the halfway point. Then displaying nearby restaurants in that area. This application was built using API calls, HTML5, CSS, and JavaScript.

Journey | <https://github.com/plaetzaw/FitnessTracker>

A user-friendly weight loss app that creates individual profiles and takes in data. Tracks data and displays results using chartjs. This application was built using NodeJS, EJS, Express, Sequelize and other dependencies.
